

Digital Promise: Experiment & Iterate: How to Implement Effective Education Technology

Posted on 10/14/2016

Digital Promise is working to improve digital learning opportunities for underserved adults in the United States. They connect entrepreneurs, educators, and researchers to support and advance the development and use of educational technology that expands career pathways and improves the quality of life for these learners.

Trying something new, adjusting, and trying again are key to finding, developing, and implementing the right ed-tech products for your specific adult learners.

Patti Constantakis, Director of Adult Education Initiatives hosted a Webinar with with Community Action, Inc. [CAI](#) and the [Mayor's Commission on Literacy](#) in Philadelphia, where they shared their stories of determining the best design and use of ed-tech in their programs.

To learn more about this experiment and iterate process, watch the recorded webinar on the Digital Promise blog.
